Language

English advanced, Spanish native.

Interests

Hiking, video games, paddle tennis, soccer, and cooking.

Relevant Experience

Ecovadis   Remote

Frontend engineer   February 2023 – Present

- Project: product platform for customers to manage their sustainability ratings.
- Member of a cross-functional team, mainly focused on our application's subscription and payments domain.
- Collaborated on setting up a microfrontend solution, facilitating the migration of our application segment, reducing pipeline execution times by ~84%, and allowing engineers to deploy their applications ad-hoc instead of depending on a common release process.
- Successfully planned and executed the adoption of TypeScript and increased test coverage up to 80% for lines of code and 85% for functions within our domain.
- Member of front-end guild for our design system, which improved our UI consistency through the application and accelerated development times.
- Involved in hiring processes, from candidate selection to technical interviews.

- Tech stack: Typescript, React, Redux, Storybook, Material UI, Styled components, Jest, Cypress, Azure, Git.

Devias   Remote
Manager / Team leader   October 2020 – December 2022

- Led a frontend-focused team of five members, participated in hiring processes, candidate selection, technical interviews, and final decision for hiring.
- Facilitated objective-setting and monitored results, leading to bonuses upon completion for our team members.
- Oversaw six projects that involved hybrid mobile applications with releases on Android and iOS, a web application with Google Maps API integration, an e-commerce platform, and a web application with a datasheet online editor.
- Stacks: Typescript, PHP, React, React native, Redux, Semantic-UI, Bootstrap, Webpack, Vite, Jest, Cypress, git, GitHub actions, JIRA, Clickup.

Stim Social   Remote
Frontend engineer   March 2015 – August 2020

- Project: Saas platform to facilitate social media growth with multiple tools, specifically for Instagram and TikTok.
- The main project was a web application, but I also worked on a help desk platform and a wordpress plugin.
- Stack: AngularJS, Vue, PHP, Less, Bootstrap, GruntJS, Wordpress, Asana.
